

# SuperSonic Trader: Instantly Executable Streamed FX Spot Prices from Multiple Sources

360T's SuperSonic Trader provides you with real-time aggregation of Streaming Spot liquidity from both your bilateral providers as well as from 360TGTX which allows trading and best execution in the FX spot market while retaining anonymity.

Through its sophisticated strategies and smart order routing, SuperSonic Trader consistently facilitates optimal execution, based on your preference for best price, fill ratios, rejection rates, last look times slippage costs and market impact.

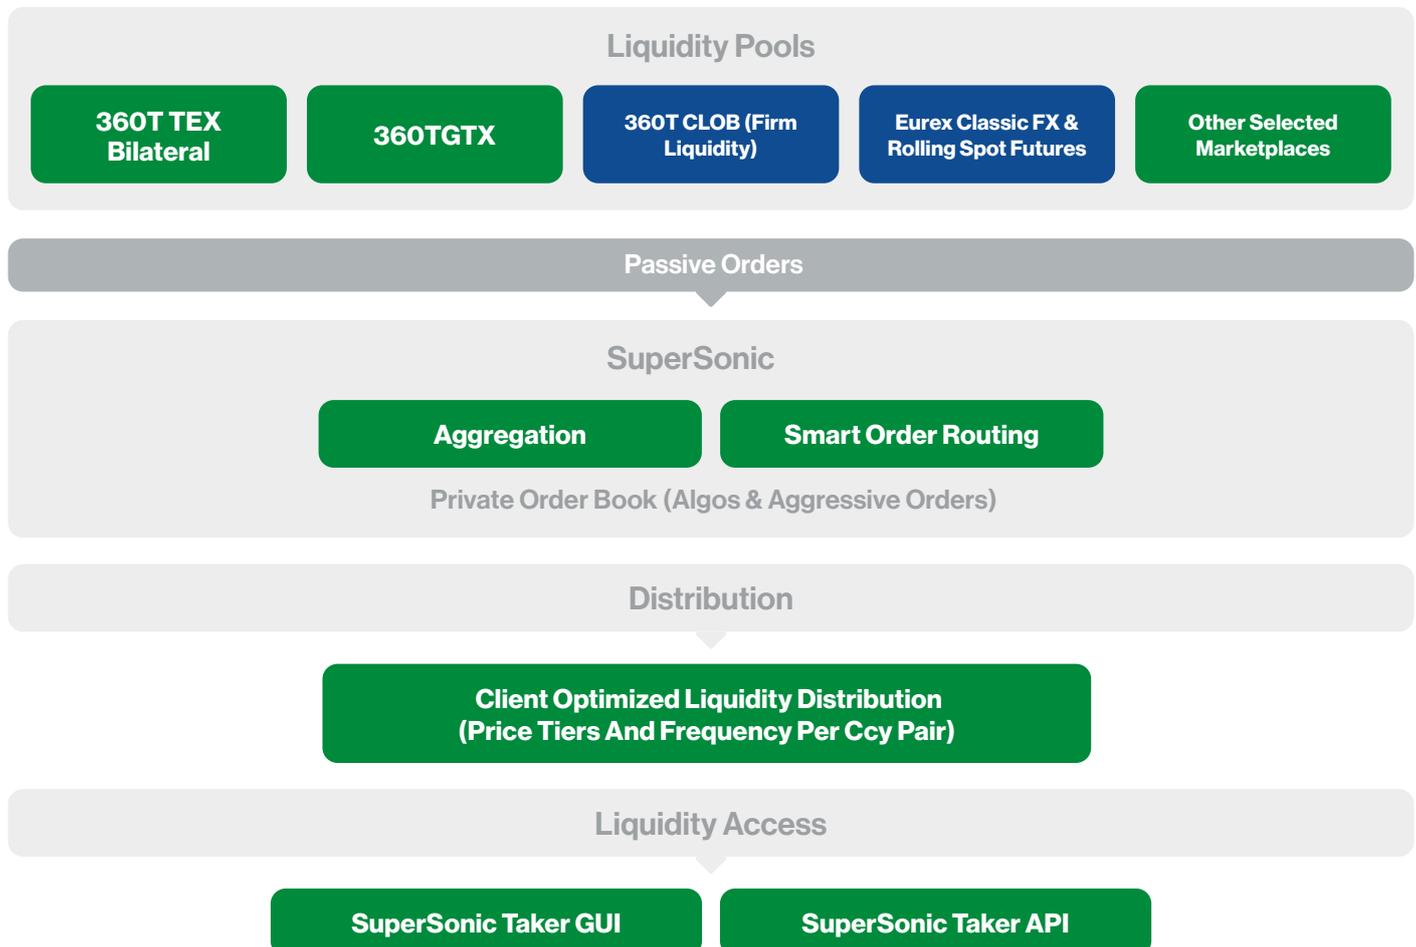

SuperSonic Trader features a wide range of strategies that tailor the presented liquidity according to your

desired execution style (e.g. full amount, best price, sweepable).

Resting and standard algorithmic execution orders enable you to manage your position professionally and effectively.

SuperSonic Trader can also be used for order management, FX Futures and Rolling Spot Futures in the Eurex exchange.

Anonymous trading is also available via 360TGTX.

## Key Points at a Glance

### ✔ RFS Boost

Combine and enrich Streaming Spot liquidity with RFS liquidity for full amount execution.

### ▶▶ Fast Orders

Easily place orders via pre-defined templates with the SuperSonic Trader GUI.

### 🕒 Price Improvements

Price improvements are passed onto Market Takers transparently.

### 📊 Top-of-Book Pricing

View top of book pricing as a VWAP ladder of configurable amounts alongside depth of quotes or price-level aggregated liquidity. Execute standard notionals via pre-defined buttons, or set a custom amount via an easy input field.

### 🕒 Slippage Management Capabilities

360T's slippage management capabilities empower you to control the cost of rejection in fast-paced Spot markets by allowing execution within a user-defined tolerance (Pip-slippage), or to optimize your execution of re-try within a user-defined time window.

### 🛡️ Limit Management

SuperSonic Trader is integrated into 360T's Risk Management Suite that ensures trader or organisation level limits are conformed to, overall, or against each counterparty.

### ⚙️ Algorithmic Orders

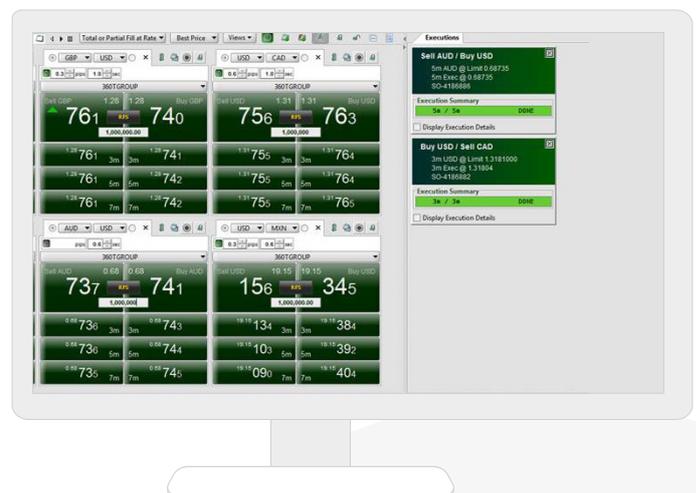

360T's TWAP algorithm locks in average price action over a time horizon, and is suitable for offloading large risk without signaling intention to the market. TCA reports enable you to appropriately measure the implementation of your strategy.

### 📊 Comprehensive Reporting

Gain access to an extensive reporting on order routing and execution performance on liquidity pools.

### 🔧 Full Customisation

Benefit from a flexible workspace, float currency pairs, and manage positions per user-defined trading session.
