# Market Data Services: SDF View

---

## Overview

---

360T offers a comprehensive set of Market Data Services to the global financial and investment community. Promoting market transparency since 2000, 360T data solutions provide market participants with quality and actionable information, essential to supporting confident price discovery and competitive price determination.

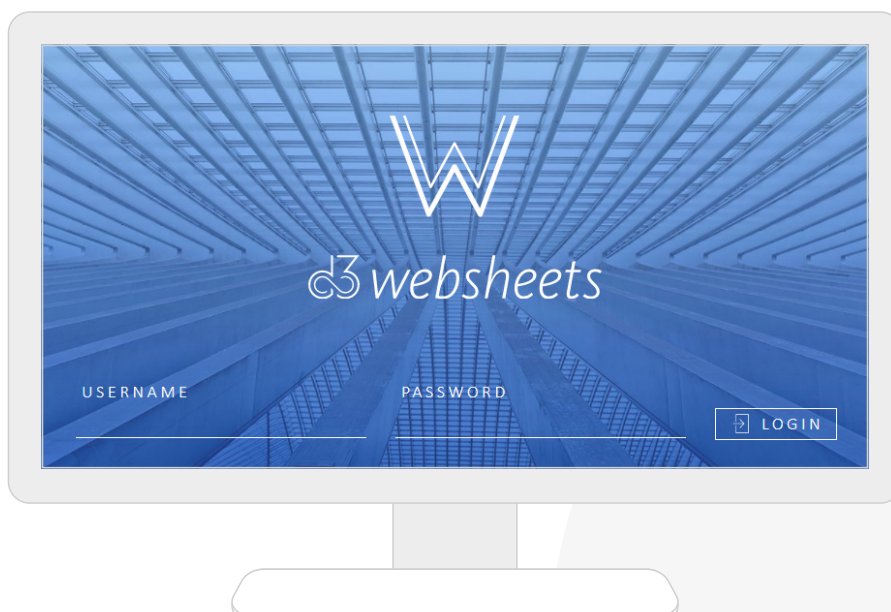

In a bid to bring market transparency to all FX consumers, 360T and their partner Digitec can now offer the Swaps Data Feed (SDF) on view only basis, the SDF View. Users can view live SDF rates, empowering decision-making processes, and safeguarding traders from information leakage that is present in the RFQ process.

”

**Every currency, every update, every day. Better market data is now at your fingertips.**

## Access

Users are granted user specific credentials, to a web hosted browser. We simply whitelist your external IP, create your credentials and share the URL: [🔗 https://sdf-marketdata.360t.com](https://sdf-marketdata.360t.com)

	USD / OMR	
	USD / KWD	
	USD / MAD	
	USD / MXN	
	USD / ZAR	
	USD / HRK	

\* During NY trading hours only

## Product Functionality

### 1. Ability to request broken dates

Broken dates can be entered as:

Number of days	<b>100</b>
Standard tenor	<b>6m</b>
ddmm	<b>2503</b>
ddmmyy	<b>300622</b>
Fwd-Fwd-interval	<b>3m-6m</b>

The result is displayed in the first line (three lines in case of fwd-fwd) of the table. All previous results are listed at the end of the table.

Broken date entries falling on holidays or weekends will be moved to the next tradable date and marked with an orange background color.

 <del>04. Jul 22</del> <del>Mon</del>	05. Jul 22	953	-563.90	-549.16	102.981	103.138
--	------------	-----	---------	---------	---------	---------

Add “!” to the entry to avoid the automatic change to the next trading day in case of a holiday.

 Click on the **remove icon** to delete a broken date line.

 Click on **Reset all** to remove all broken date results.

2. Ability to export snapshot from SDF curve in XML file

EXPORT SELECTION

3. Ability to view SDF curve on chart
