# Helping Hedge Funds to Enhance Returns

---

360T is a multibank trading platform which offers access to FX and Metals trading, as well as Listed FX via Eurex. Our suite of products is designed to enhance hedge funds' execution capabilities through automation and improving market access, to help give an edge to fund performance.

## 360T Offers

---

### Access to the Broadest Possible Range of FX Liquidity

- 360T's technology provides a single point of access for trading FX Spot, NDFs, Forwards, Swaps and Options, in addition to Precious and Base Metals.
- With a global network of users spanning more than 75 different countries and including over 200 liquidity providers, 360T can help hedge funds access unique pools of liquidity.
- Our ECN platform, 360TGTX, allows funds to trade Spot FX and NDFs anonymously, through a seamless integration into the platform workflow.

### Support for All Execution Models

- Clients have access to a series of Smart Order Routing protocols that optimise across RFS, Streaming, Full Amount, Disclosed and Anonymous liquidity.
- 360T hosts an extensive suite of Algos, giving clients access to 100+ strategies.
- A Reporting and Analytics suite is available to provide detailed feedback on the execution process and to monitor changes in execution quality over time.

### Workflow Solutions

- 360T's Execution Management System (EMS) is a next generation workflow solution focused on reducing the need for system intervention in the execution process. Designed in close collaboration with hedge funds, this highly configurable system maximises the time spent on trading rather than process.
- Easily integrated into Order Management Systems (OMS), it supports the automation of FX across the entire trade lifecycle, helping funds to increase productivity, reduce operational risks and focus on the most value-add tasks on the trading desk.
- The EMS leverages 360T's award-winning suite of market data products to help enable no-touch precision trading across a range of FX product types.

# What Makes 360T Different

---

## Unique Liquidity

The diverse universe of firms trading across 360T – which includes major banks, corporates, asset managers, hedge funds, retail brokers, regional banks, non-bank liquidity providers – means that there is a truly unique pool of liquidity available to interact with, all via a single access point.

## Advanced Analytics

Having high-quality tools and data in place for analysis is vital to improving execution performance. 360T developed its analytics-as-a-service platform, Vantage, as a comprehensive range of reporting and analytics with this at the core of it.

## FX Algos

360T has access to 20+ Algo Providers, allowing funds to access a wide range of sophisticated algo strategies in one place.

## Liquidity Management

360T offers a team of dedicated liquidity management experts available 24/5 who are focused on helping hedge funds to curate and optimise liquidity access.

## Market Data

360T's proprietary suite of data products gives hedge funds the edge they need when trading FX. It includes the award-winning Swaps Data Feed (SDF), the most accurate reflection of the FX Swap market available. Additionally, it offers unique directional Flows insight as well as Spot and Precious Metals feeds. The 360T Data products have been woven into the workflow of the platform to enable users to more effectively build and refine trading workflow, enhance price discovery and increase no-touch trading across FX instruments in a low latency trading environment.

## FX Futures & Clearing

Hedge funds can access Eurex FX Futures and Clearing directly from within the 360T platform. With the option of Classic FX Futures with monthly and quarterly deliveries, our innovative Rolling Spot Futures contract or off-exchange liquidity pools for trading Block Futures and Exchange for Physical (EFP). Funds also have the option to centrally clear their OTC NDFs, providing operational efficiencies through increased netting opportunities and lower margin rates compared to holding bilateral positions.

## Key Benefits

---

- › Tighter spreads through simultaneous multi-dealer requests and competitive pricing
- › Enhanced price discovery and tools designed to help demonstrate best execution
- › Advanced aggregation functionalities across the 360T franchise
- › Reduced operational risk via the automation of netting, staging and execution of trades
- › Sophisticated tools for Transaction Costs Analysis (TCA)
- › Dedicated local customer support and liquidity management teams
- › Unified STP export, providing one channel for dealing with the market
- › Comprehensive reporting and audit capabilities
