The Marketplace for Institutional Crypto Trading

3DX: The Marketplace for Institutional Crypto Trading

Financial Institutions across the EEA face a range of challenges when entering the crypto space. While client demand and competitive pressure are driving interest, institutions must navigate regulatory uncertainty, fragmented liquidity, operational risks, and an overall immature ecosystem. In parallel, client cost sensitivity and the need for FX transactions further complicate implementation.

These complexities underscore the demand for a secure, regulated, and efficient trading platform tailored to Institutional needs. To address this, 360T is expanding its market-proven FX trading infrastructure and existing Crypto NDF offering to include Crypto Spot trading.

3DX, powered by 360T's award-winning technology, is a MICAR-regulated trading platform built exclusively for Institutional crypto trading, offering secure access and supporting uncorrelated flow into the crypto market.

3DX offers an execution-only multi-dealer venue aiming to enhance efficiency, transparency, and performance in trading operations while ensuring compliance with the highest regulatory standards. Complementing this is a separation of duties across all functions, minimising risks across the board.

The **3DX** streaming price model facilitates tailored pricing through bilateral relationships between market participants. Plus, side-by-side FX trading enables leveraging existing 360T connectivity and streamlined hedging for cross-trades.

Crypto Spot Trading on 3DX

Crypto Spot trading features **streaming prices tailored to the individual client**, exclusively engaging with selected counterparties.

Initially, 3DX supports bilateral settlement, while remaining adaptable to various post-trade models to meet diverse client needs for **enhanced risk management** in the future.

Traders access this model through our innovative **SuperSonic Trader GUI or via API**, complemented by advanced risk monitoring tools.

Supported Assets: Bitcoin (BTC), Ether (ETH), Solana (SOL), Cardano (ADA), Chainlink (LINK), Polkadot (DOT), Bitcoin Cash (BCH), Circle (USDC, EURC), SGForge (EURCV, USDCV) and AllUnity (EURAU).

How 3DX works for clients

3DX builds on 360T's trusted FX infrastructure to offer a MiCAR-regulated crypto platform tailored to the needs of diverse client segments:

We are Providers, not Competitors

3DX operates exclusively in the B2B space — with no internal liquidity desk competing for retail clients.

Liquidity That Fits. Pricing That Competes.

Build bespoke liquidity pools and access aggregated pricing from Institutional counterparties.

Trade Crypto Like FX — with Confidence

Access crypto via familiar FX workflows, including bilateral trading and flexible post-trade.

Advanced Risk Management Tools

Use enhanced risk management tools like Limits Monitor and ADS to manage exposure.

Access Crypto via Familiar Structures

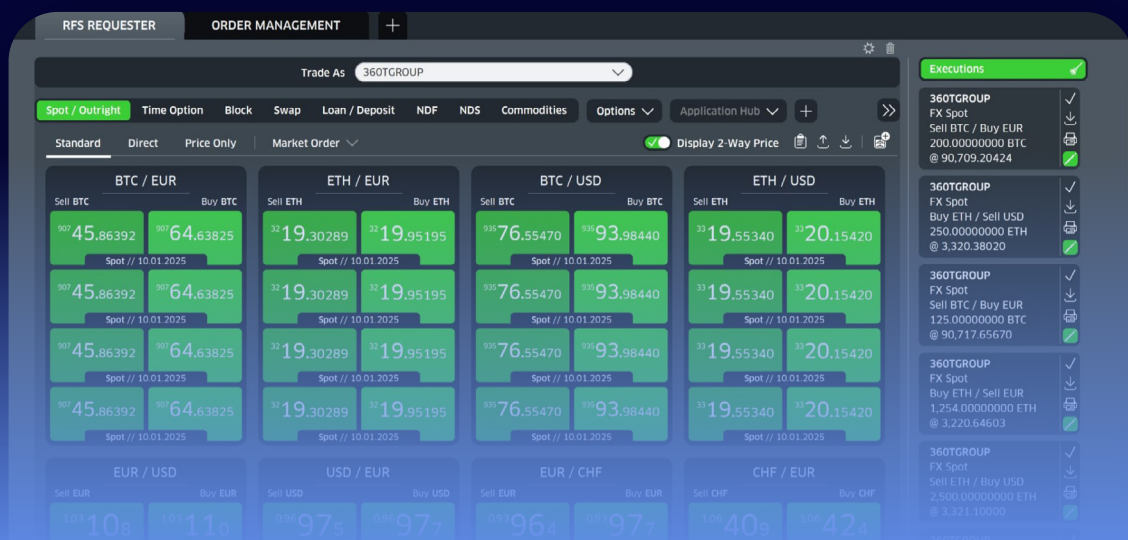

Leverage 360T's existing connectivity and technology for effortless crypto expansion.

Trust the Infrastructure Behind It

Trade crypto with confidence — secure, transparent and powered by 360T as part of Deutsche Börse Group.

Expanding 360T's Marketplace

As a regulated, global FX marketplace and technology provider with a 25-year track record of delivering robust, high-performance and innovative trading solutions, 360T also offers high-touch customer service and a transparent governance structure. This uniquely positions the firm to bridge the gap between traditional financial services and the rapidly growing crypto market.
